OEM Integration Made Simple

Toyota Motor Sales U.S.A. and Autosoft DMS

Toyota Motor Sales has approved Autosoft's DMS for integration with its Dealer Daily communications system. **Improve operational efficiencies with significant time savings and error reductions.**

F&I/Sales Integrations

- **Retail Delivery Reporting (RDR) and Credit Contract Updates:** RDR information is automatically sent to TMS. Credit Contract details are generated and sent to TMS when the dealership sells GAP, credit life, A&H, and EWU (Wear Care, Smart Lease Protection or Environmental Protection) on any deal.
- **Vehicle Updates:** Through Autosoft DMS, TMS sends vehicle inventory adjustments to your dealership daily for both new and used inventory. Similarly, Autosoft sends updates to TMS as you make changes to vehicle records for both new and Toyota-certified used inventory.
- **eContracting:** Through Autosoft DMS, you can submit your eContract directly to RouteOne for deal processing.

Accounting Integrations

- **Warranty Payments:** Autosoft automatically pulls Toyota warranty payment data every Monday morning into its Factory Payments screen from which you can apply warranty payment data to the Factory Receivables Statement. The integration simplifies payment posting, eliminating the need for manual entry.
- **Financial Statements:** Autosoft DMS enables you to generate a monthly financial statement that is transmitted directly to TMS.

Parts Integrations

- **Parts Inventory:** Autosoft sends daily and monthly parts inventory updates to TMS. The monthly update includes your dealership's entire parts inventory.
- **Parts Master:** You can download the Parts Master. The system pulls pricing updates daily, making them readily available to load into the master inventory to ensure you have accurate parts data.
- **Parts Management:** Automatically submit Parts Orders and Parts Returns generated in Autosoft directly to TMS, which facilitates parts returns and eliminates rekeying. This direct connection helps your Parts Department more effectively manage its parts inventory.

Service Integrations

- **Repair Orders:** While scheduling an appointment or creating an RO, this integration provides notification of special service campaigns. Open service campaigns can then be pulled to the RO, and your DMS will write the repair. The RO is transmitted to TMS when it is closed.
- **Labor Operation Guide:** Autosoft DMS downloads labor operations data daily. The labor operation database is available when closing warranty claims to ensure you pull the appropriate labor operation codes to the claims. The system automatically sends the RO to your dealership upon closure.

“ This integration between Toyota and its dealers is part of our continued commitment to bring innovative technologies to market that help our customers work more effectively. ”

– Bryce Veon, President & CEO, Autosoft
