

OEM Integration Made Simple

Chrysler and Autosoft

Comprehensive integration leads to the maximum performance. Autosoft is certified by Chrysler to integrate seamlessly with its dealer communications system. Exchange data quickly and securely *while increasing visibility, efficiency, and compliance across your business.*

Service

Chrysler Warranty Repair Orders | Generate Chrysler-specific warranty repair orders and warranty claims. Use the Chrysler warranty menu to enter additional information. View, print, and download warranty claims to DealerCONNECT as needed.

VIP | Retrieve and view VIP from several screens in the Service Writing module using the Get VIP button. VIP information is displayed on screen and can be printed to send with the warranty claim.

Chrysler QuickLOP Labor Time Guides | Search for labor operations to include with the warranty repair order and send with the warranty claim.

Chrysler wiADVISOR | Real-time bidirectional integration that allows you to look up service customers, schedule online service appointments, and send repair orders directly into Autosoft, eliminating redundant data entry.

Accounting

Financial Statements | Generate a monthly financial statement that is compiled, prepared, printed, and downloaded from the general ledger and transmitted to Chrysler.

Factory Statements | Pull and post receivables from Chrysler to Autosoft.

Vehicle Invoices | Pull vehicle purchase invoices from Chrysler and post them to Autosoft.

Parts

DealerCONNECT Parts Interface | Transmit parts information including purchase orders, compensation information, and parts returns to DealerCONNECT. You can also transmit communications logs to Autosoft.

“We engineered iron-clad integration between Autosoft and FCA dealer systems so no transaction will ever fall through the cracks — proof that we are committed to our dealers’ success.”

Bryce Veon, President & CEO, Autosoft

OEM Integration Guide for Chrysler Dealers
