

# OEM Integration Made Simple

## Hyundai and Autosoft

Comprehensive integration leads to the maximum performance. Autosoft is certified by Hyundai to integrate seamlessly with its dealer communications system. Exchange data quickly and securely *while increasing visibility, efficiency, and compliance across your business.*

### Sales

**Retail Delivery Reporting (RDR)** | Submit vehicle sale information to Hyundai.

### Accounting

**Financial Statements** | Pull data from your general ledger to prepare and print your standard Hyundai Financial Statement.

### Parts

**Parts Interface** | Generate parts orders and returns and submit them to the HMA DCS website from Autosoft.

**Hyundai SmartStock** | Autosoft works with Hyundai's supply modeling and retail tracking inventory management program to enhance inventory efficiencies and same-day service repairs. SmartStock uses parts information from Autosoft to forecast demand for parts.

### Service

**Warranties** | Generate Hyundai-specific warranty repair orders from Autosoft. Once a warranty claim is closed, you can enter additional information in the Hyundai Warranty Entry menu — even view, print, and transfer claims to Hyundai. Claims history displays a list of ROs sent to Hyundai that also can be reactivated.

“We engineered iron-clad integration between Autosoft and Hyundai dealer systems so no transaction will ever fall through the cracks — proof that we are committed to our dealers' success.”

Bryce Veon, President & CEO, Autosoft
