

OEM Integration Made Simple

Subaru and Autosoft

Comprehensive integration leads to the maximum performance. Autosoft is certified by Subaru to integrate seamlessly with its dealer systems. Exchange data quickly and securely *while increasing visibility, efficiency, and compliance across your business.*

Parts

Parts Orders | Easily stock parts inventory by generating parts purchase orders and returns and submitting them to Subarunet.com all within Autosoft.

Parts Returns | Manage unused and obsolete parts by generating parts returns and submitting them to Subarunet.com.

Inventory Update | Update your inventory to Subaru PartsEye and send either a daily or full history file directly to Subaru. The daily file includes current inventory, current month-to-date, and lost sales for each part. The history file includes the same data, as well as the sales history for the previous 12 months, excluding current month. The information is used by PartsEye to suggest future stock orders and optimize parts inventory.

Parts Order Import | Download parts orders to Autosoft from Subaru PartsEye. Roll your order queue into your parts order upon import.

Subaru Parts Catalog | Import parts from the Subaru Electronic Parts Catalog into the Parts Queries screen in the Parts application. Add the parts to a counter slip, RO, parts order, or quote.

Accounting

Financial Statements | Generate your monthly standard Subaru Financial Statement compiled, prepared, printed, and downloaded from your general ledger and transmitted to Subarunet.com.

Service

Subaru Warranty Repairs | Create and close service ROs for Subaru warranty claims in Autosoft using the Subaru Warranty menu to review and edit repair, labor, parts, and pricing information. Claims can be downloaded and submitted to Subarunet.com. Claims history displays a list of ROs sent to Subaru that also can be reactivated.

“We engineered iron-clad integration between Autosoft and Subaru dealer systems so no transaction will ever fall through the cracks — proof that we are committed to our dealers’ success.”

Bryce Veon, President & CEO, Autosoft
